Physician's Oath

AT THE time of being admitted as a Member of the Medical Profession
I SOLEMNLY pledge myself to consecrate my life to the service of humanity.

I WILL give to my teachers the respect and gratitude which is their due;

I WILL practice my profession with conscience and dignity;

THE HEALTH of my patient will be my first consideration;

I WILL respect the secrets which are confided in me;

I WILL maintain by all the means in my power, the honor
and noble traditions of the medical profession;

MY COLLEAGUES will be my sisters and brothers;

I WILL not permit consideration of religion, nationality, race, party politics
or social standing to intervene between my duty and my patient;

I WILL maintain the utmost respect for human life; even under threat, I will
not use my medical knowledge contrary to the laws of humanity.

I MAKE these promises solemnly, freely and upon my honor.

Dear Classmates,

We're excited (and relieved) to present you with Caduceus – the yearbook of the Indiana University School of Medicine! Just a few years ago, the classes stopped producing yearbooks altogether, for financial and organizational reasons. One class recorded their year electronically on CD, but we naively wanted to return to the tradition of publishing a hardbound paper record of our class' existence.

In order to include pictures from Match Day and graduation, we had to continue working on the book well into our PGY1 year. We think it was worth the extra work.

Meagan and I couldn't be everywhere this year, so we really depended on everyone to supply memories from the center campuses, as well as events from the last two years. Thank you so much to the following people, who went out of their way to make sure that information was accurate and that this book had pictures: Sri Atluri (Indianapolis), Becky Epstein (Indianapolis), Clint Sheets and Ben Newman (Bloomington), Kim, at Herff-Jones, Margo Herron (Evansville), Cami Pfennig (Lafayette and Indianapolis), Canary Rossum, Meeta Shah (Fort Wayne and Indianapolis), and, of course, Melissa Titus. We could have done it without you, but it would have sucked.

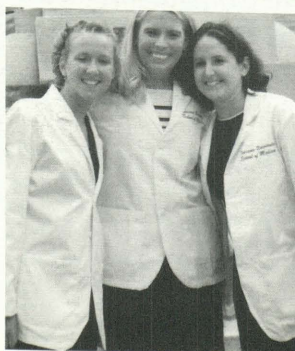

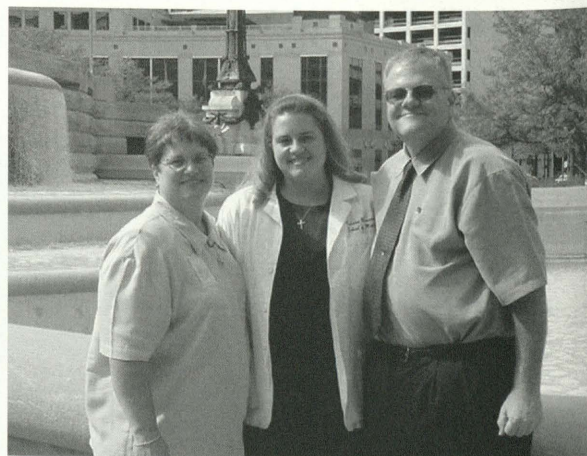

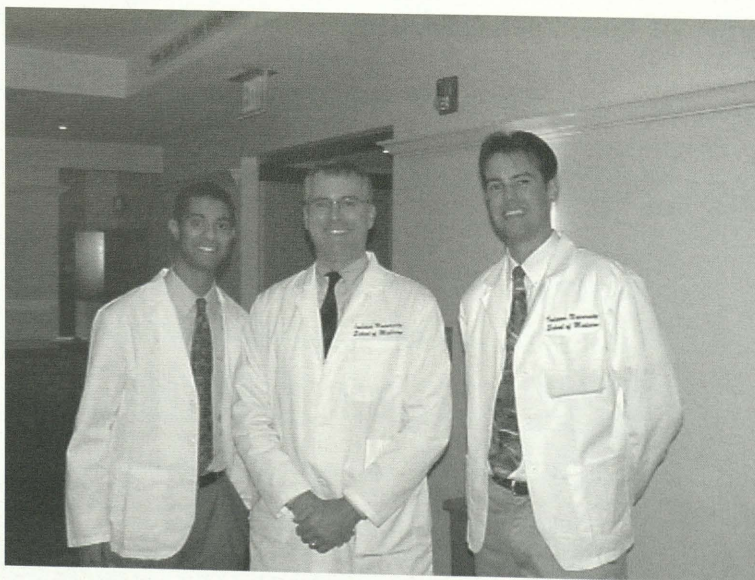

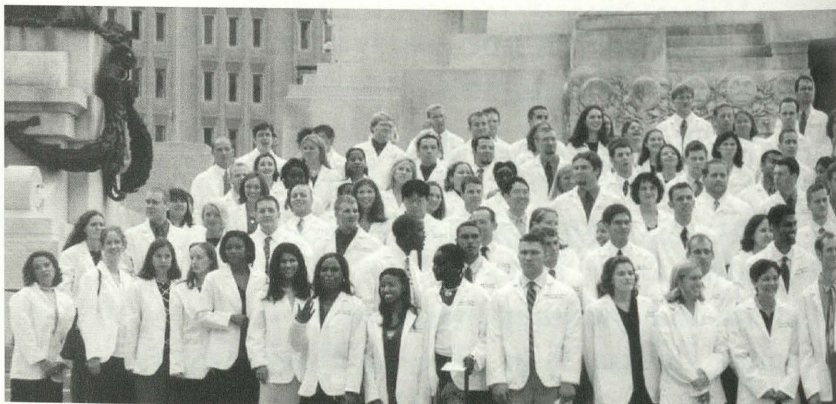

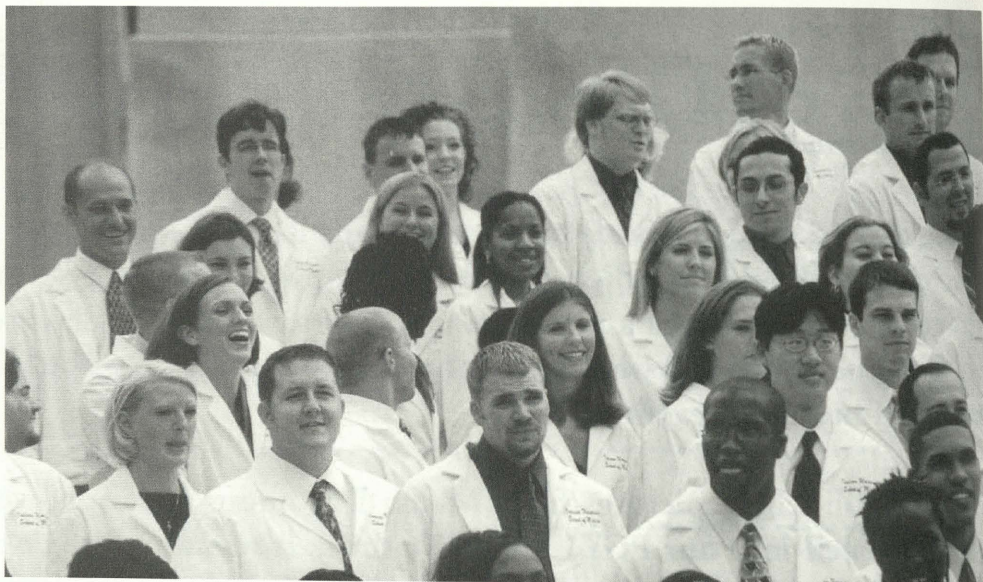

What you'll find inside are memories - some of your own and many created by your classmates. Please enjoy.

Additional Comments:

Anthony A. Andres:

I have a lot to be thankful for as I leave IUSOM. I have been taught by the best and have learned with the best.

I have met people during my four years here that really make me proud to be a part of the medical community and hopefully our paths will cross again. Beyond the hospital walls I also have so much to be grateful for. Mom, Dad, Tita, Anita, you have been there for me through it all, and your faith in me has never wavered. Stacy, you are the wind in my sails and life has been so much more beautiful and colorful with you in it. To "the guys" thanks for being there to make me laugh. You always seem to know when I need it the most. And to the future...I am ready for you—here I come!

S. Ahmed Athar:

Dear class, thank you for the love and support you have shown me all these years. More importantly, thank you for your votes. Seriously though, I have really enjoyed getting to know my classmates and it has been a pleasure trying to help out administratively. Our class has made med school an unforgettable experience. I wish everyone the best! Good luck next year!

Brian E. Barczak:

Other Comments: These are the seasons of emotion, and like the winds, they rise and fall. This is the wonder of devotion; I see the torch we all must hold. This is the mystery of the quotient; upon us all, a little rain must fall...

Ajiri S. Barnes:

Other Comments: I want to thank my husband, Maurice for supporting me in the pursuit of my medical career. You are my backbone. I thank my parents for never giving up and always believing that I could accomplish this. I thank my two beautiful children, Laila and Nathan, for keeping me grounded and making me smile daily. Last but not least I thank the Lord, with whom none of this would have been possible. You all are my shining stars, my inspiration, my energy, my heart.

Michael S. Boger:

Other Comments: I really enjoyed my four years at IUSM. Spending my first two years at the Fort Wayne center was at first challenging, but thanks to a great class I ended up enjoying my time there. I feel that the knowledge, experience and friendships will last a lifetime- thanks to everybody that made it possible.

Bart S. Brown:

Other Comments: Medical school is hard, and we all know this. But now is not a time to "know", it is a time to act. Like the time Osler wrote things down, or when Cushing matched in neurosurgery, and Lister worked for Goodyear. Let us reflect upon the compassionate times we have shared together, and spread this compassion to other places to achieve a new humanism in medicine. And let us do other things when we are not doing this. Cory Showalter loves kids.

Ryan P. Brown:

Other Comments: Thank you to my wife, Rebecca, who has always supported my decisions, believed in my dreams, and never hesitated to tell me I was just being stupid. Thank you to my daughter, Indira, who reminds me daily that she wants to be a doctor-lady just like daddy. Thank you to my daughter, Izzie, who still calls me "mommy" and doesn't care what I accomplish as long as there's cake at the end of the journey.

Varon E. Cantrell:

Other Comments: I had a great time while at IUSOM. I have met a ton of great professors, faculty, residents, and peers. If I had to do it all over again, I would come back to IU. I believe I received top notch training along with a great education. Of course, no place is perfect, but here at IU, the good definitely outweighs the bad. Great job IU. My prayer is that you will continue to help the medical community by putting out great, competent (Board/OSCE passing) physicians. Also don't forget about diversity. I believe it will make not only IU, but the community as a whole, a better place. I pray peace and happiness upon each and everyone associated with the School of Medicine both directly and indirectly. I'm out! V

Pamela C. Cates:

Other Comments: To God Be The Glory for ALL the things He has done, is doing, and is going to do for me. When we must persevere and endure obstacles and roadblocks that get in our way of achieving our goals, we obtain a greater appreciation for our purpose and position in life; I am a living testimony to this!! These past 4 years of medical school have been truly a dream come true and I stand in great anticipation and expectation of what the next 4 years of Ob/Gyn Residency has in store for me. Class of 2005, God bless you all and may you allow His will be done in your lives and in your careers!
Pamela

Steven W. Chimil:

Other Comments: May the Lord bless you and keep you. May the Lord make his face to shine upon you, and be gracious to you. May the Lord lift up his countenance upon you, and give you peace. Numbers 6:24-26

Rachel S. Darling:

Other Comments: I want to thank all of my wonderful classmates (especially those from the FW center) who helped me make it through these four years. Not only am I grateful for the academic and emotional support but also for the frequent laughter. I'll miss you all

Nicole M. Dennis:

Other Comments: It's hard to believe how fast the last four years have gone. I know the next four will probably be the toughest of my life but hopefully I'll see some familiar faces along the way to remind me that we're all in it together. Congratulations to everyone for making it this far, and best of luck in the future!

Zandra D'Hue:

Other Comments: I have truly enjoyed my time at IUSM. The faculty and administration are superior to many other schools. In addition, I have made some awesome lifelong friendships and memories. I will be forever grateful to God, my husband and my parents for supporting me on this long and arduous journey. "Commit To The Lord whatever you do and your plans will succeed."

Becky I. Epstein:

Other Comments: I just want to say how much fun I have had the past four years with everyone, for all those random memories, great times, (and binge drinking blasts) I am eternally grateful. I wish everyone the best, and am proud to have known so many of you!

Christopher D. Gamble:

Other Comments: The few words that follow will never do justice in explaining how much I owe my family and friends for their unyielding support. To my friends, thank you for making school bearable and I wish you all the best. Mom and Greg, your guidance and faith has been immeasurable. I pray that my kids will be as lucky as I have been to have people like you as parents. Nikki...my heart, your strength, courage, love and compassion make me a better person every day. Thank you for being part of my life. Finally to God-thank you for answering my prayers

Megan A. Horine:

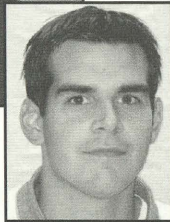

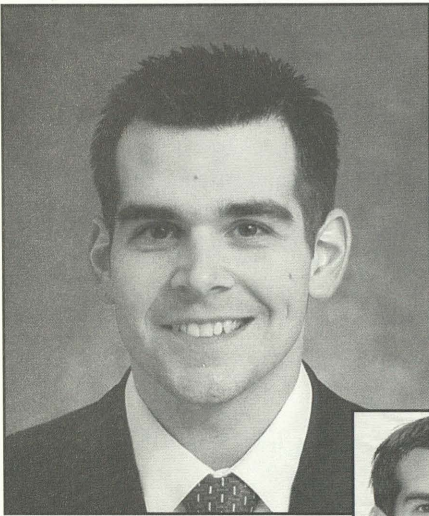

Other Comments: To the Bloomington Class of 2005: Thank you for all of the wonderful memories from theme parties and mid-day trips to Kilroys to Dr. Tom's outrageous micro stories and everything in between, and for making the first years some of the most amazing ever. Wish you nothing but the best as you proceed into your careers. IU tailgating just won't be the same!!!

Johathan C. Howell:

Other Comments: Thanks to my mentors and advisors Drs. Mervin Yoder and Edward Srour who guided me through the turbulence of my combined degree program with wisdom, grace and generosity. Also, thank you to my wife, Laura Howell, who inspires me each day to become a better physician and person

Laura K. Howell:

Other Comments: I have thoroughly enjoyed my four years at I.U. and wish to thank two of my mentors that have inspired me to pursue a career in pediatrics. Dr. Marilyn Bull's outstanding achievements in public health policy particularly car seat safety for developmentally challenged children have shown me the national impact that one pediatrician can make. Dr. Patricia Keener has been my mentor in the area of public health service and has taught me a great deal about the concept of learning through service and how to best provide for a community's needs. Lastly, I also wish to thank my husband, medical school classmate and future pediatric residency colleague Jonathan for his unending support and belief in me during the past four years- I have no doubt that he will be an excellent pediatric hematologist/oncologist and I look forward to spending our careers together!

Bao T. Huynh:

Other Comments: I hope to have a long, successful career free of litigation. IU has been a great experience. As I enter residency and beyond, I fear the best years of my life are behind me, and I realize the worst is yet to come! Nevertheless, I am grateful to have a roof over my head

Michael S. Kenly:

Other Comments: Thanks to my wife Lauren and my baby girl Gabriela for putting up with me through this emotional rollercoaster called med school. We did it!!

Robert L. Powell:

Most Embarrassing Moment: It was an innocent mid-afternoon in Microbiology lecture when I dosed off during a lecture by Dr. Tom Hrisomalos. I suddenly awoke violently jerking my body & making an unusual yelping sound in the process. The classmates nearby seemed to enjoy this spectacle quite a bit

Worst Clerkship Moment: During my pediatric cardiology elective, I came to work despite nausea and diarrhea for 24 hours. After rounding on patients for several hours and probably being a little dehydrated, I stood with my team to view the radiology images...The next thing that I remember is looking up at my teammates- they were surrounding and evaluating me. I had passed out and hit the floor chin first in the Riley PICU. Despite a mild basilar skull fracture some fractured teeth, and a short ER stay at Methodist, I came away in pretty good condition. My fellow teammates even got to practice their emergency medical skills on me!

Other Comments: I want to thank the Bloomington campus's professors and physicians for their commitment to medical education and their genuine interest in the students. Additionally, the physicians and administrative professionals were outstanding and extremely encouraging. I would especially like to thank Dr. Christopher Suelzer and Dr. David Matthews- my faculty advisors for internal medicine and general surgery

Daniel P. Quinn:

Most Embarrassing Moment: It wasn't my most embarrassing moment but...we were MSI's we were in the midst of a very long stretch of lectures in a crowded B26 (this was early enough in school that people still attended lectures). Chris "Cricket" LaFalette was sitting next to me and was apparently experienced some intestinal distress. Like an alarm before the launch of nuclear bomb, his stomach let out an audible bellow that was heard by classmates within a six row radius. By the time I looked over to see what was going on, a panicked Cricket was out of his chair and sprinting up to aisle to the back of the auditorium toward the sweet relief of the bathroom stall. He returned in time for the next lecture (30 minutes later) with the look of combined embarrassment and satisfaction the one obtains after such a transaction

Worst Clerkship Moment: Being called during the last overnight call of my Wishard Sub-I at 3 am to check out an admit from the Marion County Jail that turned out to be a prisoner w/ a peri-rectal abscess

Tracy L. Rose:

Most Embarrassing Moment: Having Dr. Wojcieszek announce to the class that she saw me hanging out at the bowling alley one weekend during Neuro- she neglected to mention that I was there with my kids

Daniel T. Sines:

Worst Clerkship Moment: General Surgery at Wishard Hospital a whole collection of moments on the Roux en Y service! The most notable of which was the chief saying I hope this lady does well cause she's really not that fat. Two months later that patient was let out of the ICU

Other Comments: To the fourth row on the left side of B26! I'll miss the friends that I met there all the lessons that I should have memorized and most of all the groove which I wore well into the seat cushion 3 seats in. Ophthalmology! Spell that 3 times fast

Stacy L. Smith:

Most Embarrassing Moment: While on my honeymoon in Jamaica during my 3rd year of medical school I was swimming with a couple of dolphins. I was doing a "dolphin push" where they push you up and out of the water by your feet. As they pushed me up into the air my swimsuit bottoms fell to my ankles in front of a huge audience of about 150 people. Yikes

LeAnn Gerkin-Stidham:

Other Comments: I had so many life-changing experiences during medical school both good and bad. I met a group of extraordinary people and connected with them on such a deep level. I grieved with friends and strangers as we watched the unfolding of the terrorist attack and tried to grasp the impact it would have on our futures. I met faculty who went out of their way to knock me down and others who worked just as hard to lift me up. And I married the man I had been dreaming of marrying since we first kissed when we were seventeen. Medical school was a remarkable journey filled with hardship and accomplishment. The day to day experience seemed excruciatingly painful and endless but, looking back, I was unbelievably lucky to have lived it. I can't believe how quickly it has gone by. I will cherish the memories I have and the friends I have made. I wish all of you the very best!

Shana M. Walton:

Worst Clerkship Moment: I was on ICU and one of my patients went into distress in the middle of the night. The nurses paged me down there to do something with no staff and my resident was not helping. Luckily, he pulled through

Aaron M. Young:

Additional Comments: Thank you to my wonderful wife, Beth, for supporting me and taking care of me while I finished school. I can't wait to start our family!
